NAME: Tara Quackenbush

We discussed Community Gardens as an opportunity to organize the community. We discussed utilizing non-traditional marketing ideas to get people interested and engaged.

- 1- Utilizing CSA's
- 2- Incorporating the Cost Savings of Utilizing Garden
- 3- Discussing utilizing a neighbor each one bring one to get people involved and interested in being engaged.

We also discussed the need to get a **community center** and perhaps that can be a hub for the Community Garden and involving the Community Police in order to get the Negative Element to see the Presence of Police and to deter a negative influence around the community.

The Community Center would include a community enterprise for artisan market business and provide capital, marketing assistance.
